

A technical drawing of a mechanical assembly, likely a valve or actuator, shown in a cross-sectional view. The drawing is rendered in white lines on a black background. On the left, a hatched vertical line represents a wall or housing. A component with a threaded section is shown protruding from this wall. To the right of this wall, a large cylindrical component is mounted. Below this cylinder, there is a smaller cylindrical component with a hemispherical top. Further down, a long vertical rod or stem extends downwards. To the right of the main assembly, there is a separate rectangular component with a vertical stem. Dimensions are indicated with arrows and text: 'G 1/2' is shown twice, once vertically on the left and once horizontally at the bottom right. The number '38.5' is shown at the bottom, indicating a horizontal distance from the wall to the center of the main assembly.
